# Todyl

Todyl Security Platform

The Unrivaled, All-in-One Security and Networking Platform

SASE (Secure Access Service Edge)
Combine networking and security in the cloud to deliver Zero Trust Network Access (ZTNA) and low latency, secure connections to any resource, regardless of where users connect

Managed Cloud SIEM (Security Information and Event Management)
Gain unprecedented visibility across endpoint, user, network, and cloud for real-time, correlated threat detection, investigation, and response

Endpoint Security (EDR+NGAV)
Unify NGAV and EDR to secure endpoints with cutting-edge ransomware, malware, malicious behavior, and memory threat protection

MXDR (Managed Extended Detection & Response)
Eliminate threats faster with a named account manager, monthly updates, direct lines of communications, and a 24×7 managed SOC providing customized threat hunting, prevention, detection, and response

GRC (Governance, Risk & Compliance)
Take charge of compliance and identify opportunities to strengthen security postures with real-time visibility

LAN Zero Trust (LZT)
Stop the spread of threats like ransomware and APTs while securing internal networks with next-generation, user-aware network access control

Benefits

Defense-in-Depth Security
Todyl makes it easy to implement a comprehensive, highly effective security program that spans prevention, detection, and response

Unparalleled Visibility and Control
See everything that's occurring across security and technology stacks while gaining granular control over your security program and user experience

Streamlined Operations
A multi-tenant platform with a one platform and one agent to implement, monitor, and manage

Highlights

All-in-One Single Pane of Glass
Manage all 15+ security and networking capabilities through one platform with a single pane of glass.

Infinitely Customizable
Todyl's modular by design approach provides complete customizability to maximize security for every budget.

Eliminates Integration Pain
Todyl optimizes each module to work together seamlessly, overcoming the integration and configuration challenges of stitching together dozens of products and tools.

Levels the Playing Field with Enterprise Capabilities
The Todyl Security Platform brings enterprise-leading capabilities to small businesses and mid-market companies, purpose-built for their needs.

Makes Compliance A Strength
Todyl gathers evidence and automatically integrates the controls the platform meets to greatly expedite the reporting process and help meet compliance requirements.
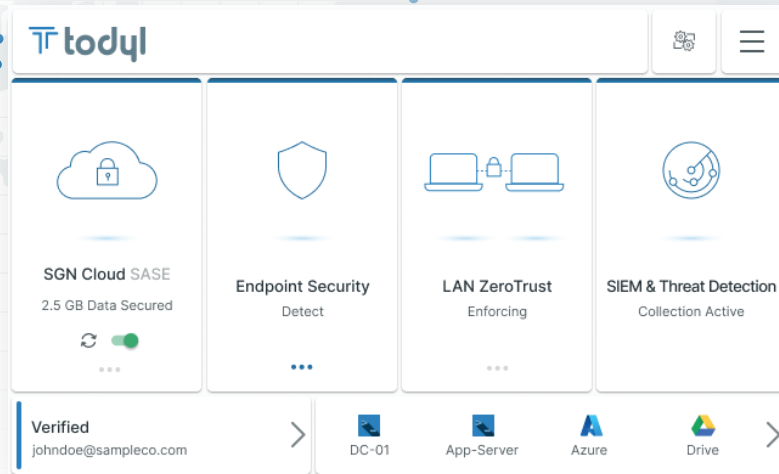

Capabilities the Todyl Security Platform Delivers

SASE & ZTNA

- Next-Gen Cloud Firewall & IPS
- VPN Replacement & Zero Trust Network Access (ZTNA)
- Identity Integration with AzureAD, Google Workspace, Duo & more
- Software Defined Perimeter (SDP) for SaaS, Cloud, and On-Prem Access Control
- Secure RDP / Secure Remote Access Tools
- Secure Web Gateway, Full SSL Inspection, URL & Content Filtering, & more

Endpoint Security (EDR + NGAV)

- Malware & Ransomware Protection
- Memory Threat Protection
- AI Powered Behavioral Analysis
- Host Isolation

Managed Cloud SIEM

- Ingest and Analyze Networking & Endpoint Logs from devices running Todyl with a few clicks
- Easily integrate with Office 365, AWS, Azure, Google Cloud, & hundreds of other cloud, application, and hardware sources
- Hardware Firewall integrations for Meraki, SonicWall & more
- MITRE ATT&CK® framework mapping
- Machine learning, behavioral analysis and more
- Real-time reports & dashboards that increase transparency and expand observability
- Threat hunting dashboards to help quickly identify the latest vulnerabilities across multiple environments

MXDR

- Assigned Detection & Response Account Manager
- 24/7 SOC Investigates Alerts, Escalates Cases, and Supports Response
- Customized Detections & Threat Hunting
- Ongoing Engagement, Configuration Review & Optimization
- Intelligence Briefings & Countermeasure Recommendations

LAN ZeroTrust

- Segment Internal Networks without VLANs & Complexity
- Firewall Inspired Interface for Simple Internal Traffic Control
- Integration with Identity for MFA Policies
- Powerful IR Support by Isolating Healthy Devices vs. Quarantining a Compromised Device
- Ability to Prevent All Network Access without MFA Authentication

GRC

- Compliance Assistant
- Policies, Procedures, & Documents Manager
- Security Assessments
- Compliance Reporting

Multi-Engine Download Scanning

- Scan downloads with 15+ anti-virus and anti-malware engines
- Stop threats before they reach internal networks and devices
